

Sensors Enhancing Senses

AI Seer Pte. Ltd.

UEN: 201942044R

UI/UX Intern

Come join [AI Seer](#) – a deep-tech startup seed funded by [Tim Draper](#) and Draper Associates which is creating AI-powered deception and emotion detection technology to “reveal incongruent words and actions at a glance”. **Our purpose is to create a more discerning, trustworthy and prosperous world. Our vision is to augment human understanding through technology and mission is to build a deception indicator and convince skeptics.** To achieve this, we are i) augmenting and commercializing accurate behavioral science with rule-based AI and ii) automating novel automated deep-learning. Our initial product market fit is in creating cutting-edge biometrics to [enhance travel across borders and protect innocents from harmful lies](#). The **UI/UX Intern** will be working in a small team including data scientists, psychologists and software developers to develop the subsequent versions of our computer vision software, with a focus on thermography.

Responsibilities

- Help develop wireframes, mock-ups, and prototypes to communicate design concepts to the development team.
- Able to produce visually appealing and intuitive user interfaces.
- Provide support in creating and maintaining design systems and style guides.
- Assist with gathering and analysing user feedback to continually improve the user experience.
- Contribute to usability evaluations and heuristic reviews to identify and address potential design issues.
- Help develop and maintain documentation for design processes, decisions, and standards.

Qualifications

- Enrolment in a UI/UX related diploma/degree
- Basic understanding of user-centred design principles and methodologies.
- Proficiency with design and prototyping tools, such as Sketch, Figma, or Adobe XD.
- Strong visual design skills and attention to detail.
- Ability to communicate design concepts and ideas effectively, both verbally and in writing.
- Ability to take direction and constructive feedback from others.

Qualities

- Have a growth mindset, be conscientious and be willing to set stretch goals for yourself.
- Dynamic, Meticulous and Resilient.
- Be open to new ideas and feedback from others and believability-weighted decision making.
